

# ENGIMACH

## THE LEGACY

ENGIMACH has been a major contributor to the growth of the engineering and manufacturing sectors for almost 3 decades. It is well-known for the high caliber of its exhibitors and visitors.

To different people, ENGIMACH means different things:

- Marketplace for showcasing & finding solutions
- Platform to make alliances & collaborations
- Springboard for launching new innovations & ideas
- Forum for knowledge sharing & networking
- Avenue for brand building & business development

## Fiber Laser Cutting Machines

Bodor Laser, as the world leader of fiber laser cutting machine, No.1 for four consecutive years by global sales volume and 10+kW Cumulative Sales 2000+ Units. Service Center Spread All Over India: Delhi / Pune / Mumbai / Ahmedabad / Chennai / Bangalore / Hyderabad. Dedicated sheet and tube cutting machine, with automatic nozzle changer, space eye, visual anti-collision detection, laser head active anti-collision, intelligent material setting etc. high technology function, and optional for ilift, iloader, iTrans, iTower etc. fully automatic equipment. The Best Production Partner of Customers.

## Trio 3-in-1 Fiber Laser Welding Machine

Mehta's Trio 3-in-1 fiber laser welding machine is gaining popularity across industries after being awarded the "most innovative product" award at the Weldfab Tech Awards 2022.

Apart from its ability to weld metals of multiple thicknesses in multiple combinations in various forms, this

machine can be easily converted to cut and clean metals by swapping nozzles, making it a must-have asset for businesses with non-standard or customized welding needs with cutting and cleaning needs.

Mehta's Trio 3-in-1 fiber laser handheld welding machine is a user-friendly and environment-friendly machine that saves time and eases the life of welders.

## ProBend E-Smart brakes

The Smart way to precision and productivity

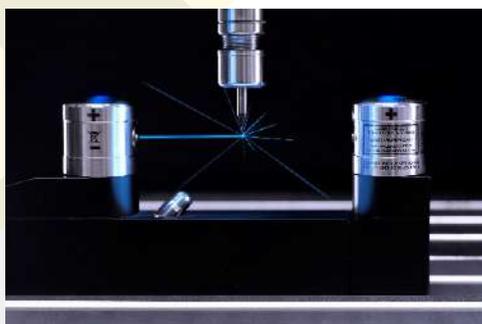

The ProBend E-Smart brakes are all electric servo motor-driven machines for the production of small and medium-sized parts requiring a bending force of less than 60 tons. These machines deliver the highest

precision and repeatability besides the highest bending productivity, day after day. These machines minimize shop floor footprint and provide bending lengths up to 1.5m. The all-servo drive system runs extremely economically on energy. Low-noise electric brake for precise bending with powerful 3d software. With roller screw connected with direct drive without a gearbox. Power saving capabilities in ProBend E smart compared to Hydraulic Press Break. Very useful for Elevator Industry, Furniture Industry etc.

## NC4+ Blue - Non-Contact Tool Setter for On-Machine Tool Measurement

Featuring industry-first, blue laser technology (patent pending) and improved optics, Renishaw's NC4+ Blue non-contact tool setting systems deliver significant improvements in tool measurement accuracy, ensuring components can be machined more accurately and efficiently on a CNC machine. Compared to red laser sources found in conventional non-contact tool setters, blue laser technology has a shorter wavelength resulting in optimized laser beam geometry. This enables the measurement of very small tools, whilst minimizing tool-to-tool measurement errors - a critical consideration when machining with a wide range of cutting tools.

## Slant Bed CNC Turning Machine HI-CUT 700/1000

Yantrang CNC Automation Pvt. Ltd. founded in 1980, is a leading manufacturer and exporter of CNC machines. The company has three production units with the main plant located at Kothariya, Rajkot. With 5+ Machine Products and 90+ various series, Yantrang has a network of 10+ dealers in 9+ states. With a team of more than 25 marketing executives across the country, Yantrange has always been able to deliver uncompromised pre and post-sales service support to its customers. Also, Yantrang CNC has expertise and excellence in Heavy Duty type machines.

## CNC Laser Cutting Machine

### A Reliable Promise

It offers cost-effectiveness, reliability, and the lowest cost per component.

Its cost-effective laser cutting machine of up to 12KW and up to 12mt long tube that can be integrated as per the demand of the customers. For any beginners, this is an ideal Laser Cutting System. Their pan India service network ensures the right solutions at the right time

The software is easy with Auto Nesting Perfectly flex-switching in multi-type fabricating jobs.

# Grand Industrial Meet and Roadshow for India Machine Tools Show 2023 held in Ludhiana

From left Mr Kamlesh Gohil (Chairman and MD KDCL), Mr Gurmeet Singh Kular (President FICO), Mr Amarjit Singh Sagar (Director LMTMA), Mr Virinder Sharma (Director MSME - DI Ludhiana, Ministry of MSME), Mr Khulwant Singh NKH (Director LMTMA) and Mr Sanjeev Sethi (Punjab State Chapter, PHDCCI)

Ludhiana, India – A Grand Industrial Meet and Roadshow of INDIA MACHINE TOOLS SHOW 2023 was held on 12 April, 2023 in Ludhiana, a major hub of Machine Tools industry. The 9th edition of the INDIA MACHINE TOOLS SHOW will be held from 18-21 May 2023 at the Pragati Nagar, New Delhi. The organizer K and D Communication Ltd. is a pioneering trade fair organizer in India with over 25 years of experience in organizing & managing national and international exhibitions all across India in different industrial segments. This Industrial Meet and Roadshow was actively supported by the Ludhiana Machine Tool Manufacturers Association (LMTMA). They have long been a prominent supporter of India Machine Tools Show 2023. In attendance were Mr Amarjit Singh Sagar (Director LMTMA), Mr Virinder Sharma (Director MSME - DI Ludhiana Ministry of Micro, Small & Medium Enterprise), Mr Kulwant Singh NKH (Director LMTMA), and Mr Sanjeev Sethi (Punjab State Chapter, PHDCCI). After their welcome and felicitation, each of these distinguished guests on the dias along with Mr. Kamlesh Gohil, Managing Director of K & D Communication Ltd addressed the large gathering of LMTMA members and many manufacturers from all over Punjab particularly from Jalandhar and Batala, the other two clusters of Machine Tool manufacturing besides Ludhiana. Mr. Kamlesh Gohil also took this opportunity to announce the launch of the Punjab Machine Tools Show which will be held at

Chandigarh from 18 to 21 October 2024. He along with all the distinguished speakers on the dias unveiled the brochure of the inaugural edition of the Punjab Machine Tools Show 2024.

Through audio visual presentations the organizers K and D Communication Limited highlighted the importance of this trade show in the larger context of the current world economic scenario and the justification for the tagline of the trade show "The Global Marketplace". As we know, India is the only large economy projected to grow significantly in the coming years based largely on the domestic demand within the country. This bright outlook for India contrasts sharply with the projections for the rest of the world and so the world looks to India for economic growth. We have seen many

international companies set up manufacturing bases in India to cater to the domestic market of India as well as the world. Again, the international emphasis on 'reliable supply chains' and 'friendshoring', coupled with the avid pursuit of FDI by the Indian government has generated a huge international interest in manufacturing in India for the whole world. This large influx of international companies has inevitably brought with it cutting edge technology, best practices and intense competition. To our credit, the domestic industry has shown enormous appetite to absorb, assimilate and adopt these technologies and are exploiting to the full these opportunities to both hone their capabilities as well as expand their outreach to international markets. Further there is the government of India's huge spend in Infrastructure, Railways,

**"This Industrial Meet and Roadshow of India Machine Tools Show 2023 is a huge success. LMTMA is proud of its 20 years long relationship with K and D. We are also very happy with the launch of Punjab Machine Tools Show 2024. We are sure it will be another feather in the cap of K and D."**  
**- Mr. Gurjeet Singh Bhambra, General Secretary LMTMA**

core industries and public enterprises following the ambitious target set by the honorable PM of becoming a USD 5 trillion economy by 26-27. Altogether, huge opportunities have arisen for the capital goods industry and machine tools in particular. INDIA MACHINE TOOLS SHOW will significantly help progress in this direction.

India and abroad were expected at the trade show. The Organizers spoke about the many platforms created to facilitate sharing of knowledge, robust interaction among participants and fostering of partnerships and collaboration. These included Seminars, B2B meets, Vendor Development etc.

The AV presentations also highlighted how INDIA MACHINE TOOLS SHOW 2023 was primed to live up to the expectations. The gross exhibition area of India Machine Tools Show was 30,000 sq. m., there were 400+ Exhibitors including International participation and 50,000+ visitors from

The Industrial Meet and Roadshow was intended to spread awareness about and stimulate interest in the local Machine Tool Industry in Punjab about participating in INDIA MACHINE TOOLS SHOW 2023. There was widespread enthusiastic response and in this way, the roadshow was a whopping success.

**Press Launch**

**KDCL, Messe Muenchen India, and GCA join hands for GUJARAT CONEX - a construction trade fair to be held from 21-23 Sept., 2023 at the Helipad Exhibition Centre, Gandhinagar**

every alternate year. Gujarat CONEX will be held on 21-23 September 2023 at the Helipad Exhibition Centre in Gandhinagar.

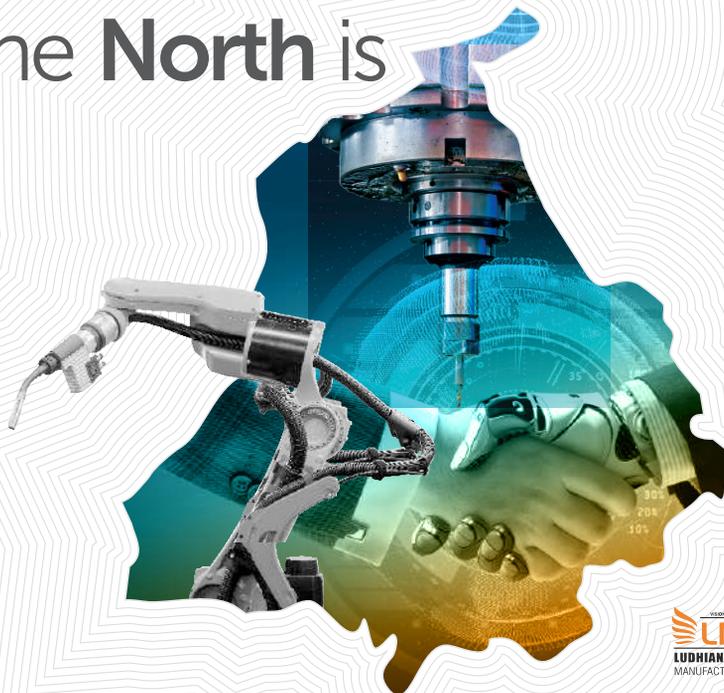

Bhupinder Singh, CEO, Messe Muenchen India, said, "Gujarat has one of the most advanced construction and infrastructure development ecosystems in the country today. Through Gujarat CONEX, we want to facilitate further growth through knowledge sharing and partnerships. Today, the equipment industry is rapidly innovating to meet the country's needs of indigenisation, cost competitiveness, energy-efficiency, and sustainability. In this regard, we are delighted to launch Gujarat CONEX in collaboration with KDCL."

Kamlesh Gohil, Chairman & Managing Director, K and D Communication Limited (KDCL) said, "As an experienced exhibitions company from Gujarat, we are happy to collaborate with international trade fairs organizer Messe Muenchen India and joint organizer Gujarat Contractors Association. The infrastructure industry is an important nation builder and employment generator today, and we are delighted to serve this market by curating a locally relevant trade show at par with global standards."

As one of the largest state economies in India, Gujarat offers exciting opportunities for the construction equipment and heavy vehicles industry to deliver innovative technologies for the multibillion-dollar infra projects currently under construction in the state today. With vast experience in serving this industry through bauma CONEXPO INDIA, Messe Muenchen India is delighted to launch

Gujarat CONEX 2023 with co-organiser K and D Communication Ltd (KDCL), in association with the Gujarat Contractors Association (GCA) as the joint organizer. This inaugural edition of Gujarat CONEX will serve as the satellite show for the western region of India, while the main show bauma CONEXPO INDIA will continue serving the pan-Indian market through its main edition in Greater Noida
