The update provided by the trade show is particularly relevant in the present context of the rapid technological transformation of Indian manufacturing following the recent, consistent and extraordinary global ascendancy of the Indian economy fueled by a burgeoning domestic demand and rise as a global manufacturing hub.

Research and development of large global industry leaders is displayed side by side with the innovations of the MSME sector to help accelerate indigenization and adoption of world-class manufacturing technology. Policy makers from the government and governing industrial bodies attend to gain valuable feedback from the industry.

Previous sixteen editions of the trade show witnessed exponential increase in attendance of high caliber exhibitors and visitors from India and abroad. All stakeholders warmly testified to substantial and lasting business outcomes. As an established platform facilitating the meeting and interaction of all stakeholders over a five-day period, the trade show helps shape the course of Indian manufacturing and industrial progress.

This 17th edition is primed to outclass previous editions.

Testimonials of Exhibitors in the 16th edition in 2023

“...ENGIMACH is one of the biggest machine tools show...”
