POWERING INDIA'S INDUSTRIAL FUTURE

RAJKOT AN EXTRAORDINARY STORY OF ENTERPRISE & ENGINEERING GENIUS

The rise of Rajkot over the last two decades as a major Indian manufacturing hub integral to global supply chains is truly a remarkable story.

The Rajkot machine tools industry has played a pivotal role in this rise. From being an importer of technology at the turn of the century to becoming an exporter of most sophisticated CNC machine tools to advanced countries today, the transformation of the local machine tools industry has been phenomenal.

It is a truly an inspiring example of 'Make in India' and becoming 'Atmanirbhar'.

The increasing local availability of advanced machine tools ignited the growth of all other regional industries like auto components, diesel engines, bearings, pumps & valves, castings & forgings, and various industrial equipment.

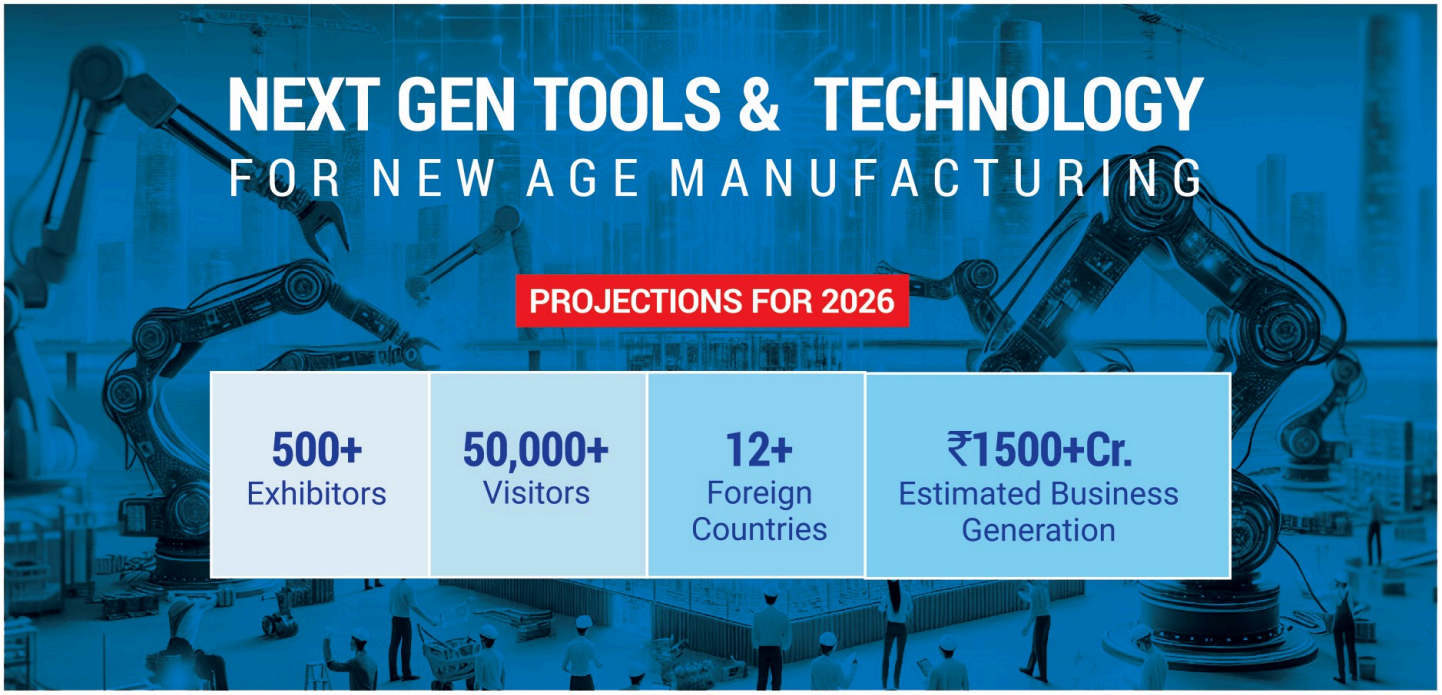

TWO DECADES. ONE DEFINING EXHIBITION PLATFORM

10th RAJKOT MACHINE TOOLS SHOW

Jointly organized by the apex body of the local machine tools industry, and India's leading exhibition and investment summit organizer, the trade show has since 2006 and over nine editions, played a crucial role in the industrial progress of the region.

Consistently featuring global industry leaders alongside MSMEs, the exhibition has not only enabled rapid adoption and indigenization of world-class technology but has also been invaluable in opening new markets and business opportunities for the regional industries. In this way, the exhibition has contributed to the rise of Rajkot as a major Indian manufacturing hub.
