### ENGIMACH 2025 to Showcase Latest Manufacturing Technologies

From 3-7 December in Gandhinagar, the event will showcase 10,000+ products across the production ecosystem.

India's manufacturing sector is growing rapidly and actively embracing the Fourth Industrial Revolution. In this context, ENGIMACH 2025, known as a leading international platform for manufacturing technology, is set to showcase innovations from global giants, MSMEs, and emerging startups shaping the future of manufacturing. Now in its 17th edition, ENGIMACH has become one of India's largest manufacturing technology exhibitions. Held from 3rd to 7th December at Gandhinagar's HeliPad Exhibition Centre, it will feature 1,000+ exhibitors from over 16 countries, including more than 100 international participants. Spanning one lakh square meters, the exhibition will present over 10,000 products representing the entire production ecosystem. This edition will feature solutions suited for Industry 4.0 environments, including cyber-physical systems driven by IoT, Cloud, Big Data, and AI offering deep interconnectivity and intelligence. The exhibition will include smart sensor-equipped, data-driven machines capable of autonomous decision-making. It will also highlight smart manufacturing, integrated logistics and inventory management, predictive maintenance, and mass customization. Kamlesh Gohil, Chairman & Managing Director of K & D Communication, the organizer of ENGIMACH, said,

"Over the past three decades, ENGIMACH has played a significant role in advancing India's engineering machinery and machine tools sector. As the world increasingly sees India as a manufacturing hub, this event has become even more relevant. With rising domestic and international demand, the Indian manufacturing sector is undergoing rapid technological change, and ENGIMACH 2025 will highlight the latest global developments shaping the future. The event is being held at an ideal time, as India's economy recorded 7.8% GDP growth in the April-June 2025 quarter—the highest in five quarters—despite global challenges. The Indian machine tools segment, valued at \$1.5 billion in 2023, is projected to grow at 8.2% CAGR through 2032. Alongside

ENGIMACH, several concurrent shows will take place, including the 3rd Castings & Foundries Expo and the 7th India Tools Show, as well as an International Buyer-Seller Meet, technical seminars, and a startup summit. The exhibition expects over 90,000 visitors, including industry leaders, policymakers, and representatives from major industrial organizations. Business inquiries are projected to exceed 75,000 crore, more than three times the \$1,550 crore generated during the previous edition. In addition to machine tools and automation, the exhibition will also showcase material-handling equipment; pumps and valves; hand and power tools; welding equipment and consumables; IT-enabled services like machine tool accessories; gears, bearings,
